BERMAQ®
ACRYLIC POLISHING & CNC MACHINES

AM2-i

Economic efficiency with outstanding quality

The AM2-i acrylic polisher is an efficient and versatile machine, capable of performing multiple tasks by combining its automatic and manual functions. This machine for polishing plastics and PMMA stands out for its flexibility of use and its economical price.

It can polish straight edges or angles up to +45º.

Tool sharpening service in 24h

WORKS WITH TOOLS THAT ARE 100% ORIGINAL BERMAQ

It has a manually tiltable head
for work up to +45º on all types of soft materials.

PMMA	PRINTED PMMA	PMMA COLOR	PET-G	POM	ACM	PC	PMMA + PAPER	RESIN	SOL SURF
PMMA + ALU	PMMA INLAYS	SAN	PVC	PE/PS	ALU	PLASTIC	PMMA XT	PMMA GT	COMP

Characteristics:

Usable length: 1.400 mm
Max. thickness: 120 mm (straight) / 75 mm (45º bevel)
Maximum cutting depth: 4 mm
Milling motor speed: 5.000 to 10.000 RPM
Feed speed: up to 10 m/min
Workpiece clamping: 5 clamps
Minimum/maximum inclination: -2º to +45º.
Milling angles: 15º, 22.5º, 30º, 45º and 60º.
Power supply: 380 V I 3PH + N + PE // 50Hz/60Hz
External dimensions: 2.500 x 1.200 x 1.650 mm
Weight: 1.200 Kg
CE safety standards
Automatic feeding with presser
